

Macksteel's Feedbunks are constructed for years of use.

Our Tube Leg Bunks are constructed with heavy 10ga sheet and 6" x 4" rectangular tube legs. The outsides of the legs are flush with the outside of the bunk, providing a smooth surface to drive along. We call these bunks, "Hired Man Proof."

Our Channel Leg Bunks are economically constructed to provide you with the best value in bunk feeding equipment. These bunks can be made with 14ga, 12ga, or 10ga sheet to allow you to customize the bunks to your needs.

Any length is available, 20fters are standard.
